

Rimbachia bryophila - Espèce qui parasite les mousses, dont notamment *Rhynchoszegium* sp. - Réaction J- Pas de cystides – Contexte parsemé de cristaux +/- rhomboédriques
Photos Francis Dechany. Fiche composée par Marcel Lecomte

Chair fragile, membraneuse ; hyménium veiné

Basides

A microscopic image showing a dense field of small, translucent, and semi-transparent crystals. The crystals exhibit a variety of shapes, including cubes, hexagons, and irregular polygons. They are set against a pinkish, fibrous background. The lighting highlights the edges and internal structures of the crystals.
